We Deliver Carbon

As an integrated technology enterprise with over 20 years of expertise in carbon materials, we manage the entire production process—from raw materials to final products.

Our scientists and engineers continuously apply deep technical expertise and advanced manufacturing processes to deliver optimal material solutions to our customers.

Headquarters, Liaoning, China

Clean Energy

Lithium Battery

Pitch Coating

AYD's RefineU Series Petroleum Pitch enhances lithium-ion battery anodes by facilitating the formation of a thin, dense, and stable Solid Electrolyte Interface (SEI) membrane. This advancement delivers improved initial charging efficiency, superior cycle performance, and an enhancement of the battery's operational capability.

Carbon Fiber

Pitch Based Carbon Fiber

AYD is a pioneer in pitch-based carbon fiber. Based on carbon fiber, we have developed a complete, integrated carbon material supply chain. Our pitch-based carbon fibers are widely used in carbon fiber composites.

Semiconductor

PPM \leq 20

We have witnessed and contributed to the rapid development of the semiconductor industry.

Our semiconductor-grade thermal insulation is produced with the most advanced technique and strictest quality standards.

Crystal Growth

We manufacture insulation materials for semiconductor-grade crystal growth furnaces using a unique fiber alignment technic.

Epitaxy

We offer comprehensive hot zone solutions for epitaxial equipments.

Shield Insulation

Cover Insulation

Photovoltaics

Thermal Insulations

Our customized photovoltaic thermal carbon fiber materials are characterized by their outstanding insulation performance and exceptional durability.

Energy Storage

Electrode Felt

AYD's Flow series electrode felt uses high-quality raw materials and our strict process control to provide stable performances for flow batteries.

Optical Fiber

Our CarboniteX series thermal insulation is also widely used in crystal growth applications within the optical fiber industry.

Soft Felt

AYD's rayon-based soft felt is manufactured with strict process control, making it suitable for high-temperature furnaces across various industries.

High-Temp Furnaces & Equipments

Our thermal insulation products are widely used in the high-temperature heat treatment industry. With our deep understanding of carbon materials, we provide our customer across various industries with customized hot zone designs and product applications.

We offer insulation solutions for

- Powder Metallurgy
- Sintering
- Deposition
- Diffusion
- ...

Based on numerical analysis(FEM), we also provide the following services:

- Structure Optimization
- Hot Zone Design

RefineU Series Petroleum Pitch

Product	Softing Point (°C) Mettler	Carbon Yield (wt%) GB/T268	Coking Yield (wt%) GB/T8727	QI (wt%) ASTM D2318	Ash (wt%) ASTM D2415
PE-150	145-155	≥47	≥50	≤0.5	≤0.1
PE-180	175-185	≥54	≥57	≤0.5	≤0.1
PE-200	195-205	≥58	≥60	≤0.5	≤0.1
PE-250	245-255	≥67	≥69	≤0.5	≤0.1
PE-280	275-285	≥73	≥75	≤0.5	≤0.1

FiberElite Series Pitch-Based Carbon Fiber

Product	Item	Carbon Content wt%	UTS MPa	Young's Modulus GPa	Fiber Diameter μm	Resistivity mΩ·cm	Ash wt%	Fiber Length mm/μm
FiberElite Chopped	CC-6	≥95	≥345	≥27.6	10-15	4-8.5	≤0.05	5-13
	CC-12							8-20
	CC-25							20-30
FiberElite Milled	CP-100	≥95	≥345	≥27.6	10-15	4-8.5	≤0.05	80-150
	CP-200T							100-200
	CP-200							130-260
	CP-400H							250-450
	CP-400							280-500
	CP-600							450-750
	CP-800							700-950
	CP-1200							
	CP-3200							

Rigid Insulation

Feature		Unit	SolarShield	CarboniteX(Graphitized)	CarboniteX(Purified)
Carbon Content		wt%	≥99	>99.9	≥99.99
Ash		ppm	≤200	≤100	≤20
Bulk Density		g/cm ³	0.13-0.18		
Thermal Conductivity(1000°C)		W/(m·K)	<0.3		
Size			Customized		
CTE	0°C-1000°C	×10 ⁻⁶ /K	<3.5		
	0°C-2000°C		<6.0		
Compressive Strength		MPa	≥0.55		
Flexural Strength		MPa	≥0.69		

* All strength tests are in the cross-sectional direction, and the bulk density can be customized

Soft Felt

Feature	Unit	SolarShield	CarboniteX
Carbon Content	wt%	≥99	≥99.99
Ash	ppm	<500	≤20
Bulk Density	g/cm ³	0.08-0.13	
Thermal Conductivity(RT)	W/(m·K)	0.06-0.12	
Length	m	≥6	
Thickness	mm	10	

Flow Series Electrode Felt

Feature	Unit	Value
Bulk Density	g/cm ³	0.08 ~ 0.11
Thickness	mm	2.5±7.5%; 4.5±7.5%
Ash	%	≤0.5
Porosity	%	> 90
Resistivity	mΩ·cm	< 300
Surface Resistivity (0.1MPa)	mΩ·cm ²	< 200
Compressive Strength	MPa	≥0.12
Width	mm	> 1300 (Customizable)
